

Wolfgang Amadeus Mozart

Mozart only lived to be 35 years old but wrote over 600 compositions in that time!

Did you know
I was homeschooled?

Mozart was born over 250 years ago in Salzburg, Austria.

This piano is from the Mozart museum. In Mozart's time, pianos were smaller and made differently than they are today. They were called harpsichords.

Mozart was a child prodigy. That means he could play and write music as well as an adult when he was just a little boy!
